**:: OUR PARTNERS ::**

Many of our clients are internationally operating groups which do not just think and act on a global basis when developing new markets, but rather also increasingly upon the development and undertaking of assessment and training measures. In view of the company-wide human resources development, these companies often wish to transfer existing concepts to other countries, taking due account of cultural differences and special features, and to develop methods and instruments for standardised application all over the world.

As the German shareholder of the GAPI („Global Alliance for Performance Improvement“), which was established in 1996, Scharley & Partner can accordingly fall back on an international network of consultancy companies from Europe, Japan and the USA, which in their respective countries are among the most renowned specialists in the assessment and development sectors and which have already worked together with us successfully on a whole number of cross-border projects.

**list of partners >>**
